

# WellStar Pediatric Orthopedic Surgery

Leading orthopedic surgeons and a fellowship-trained pediatric anesthesia team are offering outpatient orthopedic options for pediatric and adolescent patients at WellStar Windy Hill Hospital. Our pediatric patients are treated in a child-friendly setting with the following areas of specialty:

- Pediatric Anesthesia
- Specialized Nursing
- Pediatric Imaging with Pediatric Radiology
- Pediatric Physical Therapy

Anesthesia is administered by fellowship-trained providers with WellStar Medical Group, Pediatric Anesthesia; patient care is provided by WellStar Windy Hill team members.

For more information, call 770-956-STAR (7287).  
2540 Windy Hill Road • Marietta, GA 30067

# Full-Service Pediatric Emergency Care

If your child is experiencing an emergency, WellStar Cobb, Douglas, Kennestone\* and Paulding hospitals offer children’s emergency departments.

WellStar is proud to partner with a leading pediatric emergency group known for providing the highest level of care for Atlanta’s children.

The children’s emergency department delivers quality comprehensive, child-focused care. It is uniquely equipped to handle all medical emergencies – from colds and flu to lacerations, broken bones, head injuries, sports injuries, bumps, bruises, rashes and more.

For more information, call 770-956-STAR (7287).

Pediatric Inpatient Services available at WellStar Kennestone Hospital

# WellStar Pediatric Services

*“From the moment we walked in we got everyone’s undivided attention. The facility was amazing but the staff far outshined the building.”*  
- Genna, Mother

Quality pediatric care, close to home.

# WellStar Pediatric Center

The **WellStar Pediatric Center** offers a wide range of high-quality, child-centered services with convenient hours for busy parents. Our specially trained pediatric experts – including radiology, pediatricians, subspecialists, technologists, physical therapists, a supportive child life specialist and other caring team members - are dedicated to your child's well-being.

Water-themed décor and interactive play areas create a calming effect for pediatric and adolescent patients. When imaging or lab tests are needed, our prompt appointments and rapid test results give you peace of mind.

## Imaging

Pediatric radiology, with timely test results and low radiation dosage levels carefully calculated for children's safety. The latest imaging technology - with competitive pricing - is available, including X-ray, MRI, CT and Ultrasound.

Our expert pediatric anesthesia team administers sedation when needed.

## Lab Services & EEG

Easy access and prompt turnaround. Our professional team works with you and your child for the best experience possible.

## Pediatric Physical Therapy

OrthoSport WellStar Rehabilitation includes low-impact Hydro Track for aquatic physical therapy and other pediatric treatment, including sports rehabilitation and pre- and postoperative rehabilitation. To learn more, call 678-797-5734.

**After Hours Care** is available for sick visits that do not require the Emergency Department. For more information, call 678-354-CARE (2273).

**WellStar Medical Group, KenMar Pediatrics** practice hours are 7 a.m. – 4 p.m. For more information, call 678-797-5735.

**Additional Pediatric Specialties Including:** Orthopedics, GI and Neurology

**Pediatric Imaging** at the WellStar Pediatric Center is focused one-hundred percent on your child's needs and well-being. Features of WellStar Pediatric Imaging include:

- **Same-day appointment** availability for non-anesthesia scans
- **Low-radiation dosage levels** carefully calculated for children's safety
- **Competitive pricing** for all imaging
- **Pediatric Radiology**, with timely test results
- **Pediatric Anesthesia Team** is available for outstanding, safe care should your child need it. The latest imaging technology is available, including X-ray and ambient environment MRI, CT and Ultrasound.

*Low-dose radiation X-ray and ambient environment MRI; CT and Ultrasound, all carefully calculated for children's safety.*

- **Ambient Experience** in our imaging suites soothes pediatric and adolescent patients and empowers them to choose their own ambient environments during testing, with music, movies and interactive art.
- A **Mini Scanner** offers a unique educational tool to teach through play how a CT/MRI scanner works, with interactive miniature scans of toys.
- A **Child Life Specialist** offers special expertise to reassure and to help children and their parents during tests and procedures. The skill of this professional intervention decreases the need for sedation.
